

Real Federacion Española de Atletismo (RFEA)
Att. Mr. Jose Luis de Carlos
Avda. Valladolid 81 - 1 28008 Madrid
SPAIN

18 December 2012

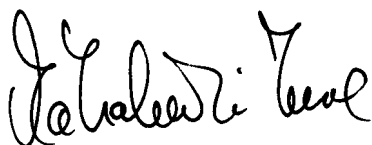

Dear Jose Luis,

Thank you for your letter d/d 13 September 2012 and the material you sent IAAF about the testing of the Sport Solution VDM System SMID.

As you know, technological devices (e.g. Timing Systems, False Start Detection Systems, Wind Gauges, Distance Measuring Equipment etc.) used in athletics are currently not yet issued a product certificate by the IAAF and therefore no certified lists for such systems / devices are available at present. The IAAF is still working on the exact certification criteria and specification for these and similar items.

Based on the evaluation carried out by your Federation's Testing Group, we consider the above mentioned system approved to be used for the measurement of horizontal jumps in international athletics competitions organised under IAAF Rules and Regulations. This approval, however, is temporary and once IAAF introduces standardised certification procedures, the system will have to be retested to prove compliance with the agreed criteria.

Sincerely,

Imre MÁTRAHÁZI
Competitions Department, Technical Manager
